

Immuno-Detox Prime

Essential maintenance for patients over 45 years of age. Ideal for patients with compromised immune systems, liver conditions and to ward off flu and colds.

Contains natural agents that have been shown in human clinical studies to strengthen the immune system and speed up the body's ability to detoxify impurities, toxins and other potentially damaging chemicals that lead to degenerative illnesses. It is the perfect supplement for immune compromised patients, patients recovering from chemotherapy and radiation, patients with psoriasis, eczema, acne and other skin lesions aggravated by a build up of toxins, bacterial endotoxins, irritants or allergens. It is also beneficial for patients with recurring herpes infections and/or canker sores, patients with liver damage from alcohol, drugs or infections (e.g. hepatitis), and patients wishing to prevent the age related decline in immune and detoxification function that occurs after the age of 45.

Milk thistle and indole-3-carbinol have shown proven benefits in regards to improving the action of detoxification enzymes, helping the body rid itself of toxins, carcinogens and other impurities. Milk thistle also helps repair damaged liver cells and raises liver glutathione levels. Reishi Mushroom extract and Astragalus, are the two most widely used immune modulators that have been tested in human clinical trials. They have both been shown to have a positive effect on bolstering immune function especially within immune compromised conditions, and to improve recovery from chemotherapy and radiation treatment. As we age the immune system becomes weaker and detoxification enzymes become sluggish. Thus, the ingredients in Immuno-Detox Prime can help individuals maintain more youthful function of these systems, helping to guard against flu, other infections, and a host of degenerative conditions.

Clinical Applications:

- Immune and detoxification support for individuals entering the age range of 45-50, which is the stage in life when these functions become sluggish predisposing to cancer and increased risk of virulent and life threatening infections (e.g. pneumonia)
- To help ward off upper respiratory tract infections
- To combat a weakened immune system (e.g. chronic fatigue, mono, post radiation treatment etc.)
- Adjunctive nutritional support for Eczema, Psoriasis and Acne

Active Ingredients

Milk thistle (std. 80% silymarin)	300 mg
Indole-3-Carbinol (97% grade)	50 mg
Astragalus (2:1 grade)	200 mg
Reishi Mushroom Powdered Extract (std. 10% polysaccharides, 4% triterpenes)	60 mg

Amounts for 2 capsules, 60 per bottle

Contraindications & Considerations

Conditions:

- Pregnancy
- Breast Feeding or Lactation

Medication/Apparatus:

- Anti-coagulant therapy or drug such as Warfarin or Coumadin¹
- Immuno-Suppressive Drugs
- Hypoglycemic Drugs¹
- Antihypertensive drugs¹

¹ Monitor patient tolerance with supplementation
