

Thyro-Support Formula

Thyroid support nutrients to help correct symptoms of low thyroid function. This product can also be used with thyroid medication.

Contains essential nutrients to support thyroid function. This product can help you overcome symptoms of fatigue, difficulty with losing weight, easy weight gain, cold hands and feet, skin texture changes, and lowered resistance to infection, which are commonly caused by sub-optimal thyroid function. Many anti-aging experts suggest, while thyroid disease is rare, thyroid dysfunction is very common as we age, beginning as early as age 35.

The American Association of Clinical Endocrinologists estimates that 1 in 5 women and 1 in 10 men over the age of 60 suffer from an under-active thyroid gland. Anti-aging experts suggest that the number of people with sub-optimal thyroid function is much higher than this, with symptoms of slower metabolism often beginning between 33-40 years of age.

Although symptoms of an under-active thyroid require medical assessment, Adëeva Thyro-Support Formula is a helpful adjunct to thyroid hormone replacement therapy. This product should be used to boost thyroid function especially in cases of slow metabolism where the results of thyroid testing do not meet the medical criteria for hormone replacement therapy.

Adëeva Thyro-Support Formula contains three essential nutrients that work synergistically to support thyroid function:

- L-Tyrosine and Iodine are required to make thyroid hormone.
- Coleus Forskolin has been shown to increase the release of thyroid hormone from the thyroid gland.
- Gum Guggul has been shown to increase the conversion of T4 to T3 - the most potent form of thyroid hormone.

Clinical Applications:

To support thyroid function in cases where symptoms of under-active thyroid are present in the absence of abnormal thyroid blood tests (fatigue, skin and hair changes, slow metabolism, easy weight gain etc.)
.....
Adjunctive nutritional management given concurrently with thyroid medication in cases of established hypothyroidism

Active Ingredients

Coleus Forskolin (10% extract)	200 mg
Iodine (from kelp powder)	300 mcg
L-Tyrosine	500 mg
Gum Guggul (2.5% Guggulsterone)	300 mg

Amounts for 2 vegetable capsules, 60 per bottle

Contraindications & Considerations

Conditions:

- | | |
|---|--|
| -Pregnancy | -If kidney has been removed ¹ |
| -Breast Feeding or Lactation | -Kidney clearance problem |
| -Kidney Failure (Renal Failure) ¹ | (e.g., a dialysis patient) ¹ |
| -Received a transplant of any kind ¹ | -Hyperthyroidism |
