

Ultimate Glutathione

Essential Protection Against Our Toxic Environment and Support For Common Health Challenges

Contains natural agents that are known to boost liver and cellular levels of the antioxidant glutathione. Glutathione is not only a premiere cellular antioxidant, but is also required for detoxification of many dangerous environmental chemicals. In many chronic liver conditions and immune-compromised states, glutathione levels are reduced or depleted. Supplementation with factors known to boost glutathione levels has been shown to be an important part of the nutritional management of these conditions and often facilitates better overall outcomes with improved liver and immune function.

Studies show that supplementing with glutathione itself is not an efficient way to raise glutathione levels since it will be poorly absorbed from the gut and is primarily degraded by protease enzymes (digestive enzymes). Clinical and experimental studies demonstrate that glutathione levels are best optimized through supplementation with meaningful doses of N-acetylcysteine, alpha-lipoic acid, silymarin (from milk thistle) and glutamine, along with antioxidant vitamins and minerals (vitamin C, beta-carotene, selenium, vitamin E) provided by a high potency multiple vitamin and mineral.

In today's toxic environment, we are exposed to various pesticides, herbicides, plastics (e.g. PVC), xenoestrogens (e.g. bisphenol A, parabens) and pollutants in our food, water and air. Given these circumstances, our liver, detoxification and immune systems require additional support to maintain and optimize glutathione levels. The human body has had very little time to adapt to these new challenges, many of which may over-tax our detoxification system, suppress immune function and exert other undesirable health effects. As such, we recommend that by age 50, individuals take 1-2 capsules per day of Adeeva Immuno-Detox Prime.

To add an additional level of insurance or if you suffer from a chronic liver ailment, compromised immune function, or feel that your work or home environment (or the food/water you consume) contain excess levels of toxins or pollutants, then you should consider adding Ultimate Glutathione to your overall wellness/longevity program. The ingredients in Ultimate Glutathione have also been shown to improve glucose tolerance, facilitate excretion of heavy metals, provide neuroprotective effects, slow progression of chronic kidney disease, slow the progression of HIV infection, support intestinal and immune cell function and provide antioxidant protection to many tissues.

Clinical Applications:

General Health Support	– 1 capsule per day
Liver Ailments	– 2-4 capsules per day
Kidney Disease	– 2-4 capsules per day
Regular Acetaminophen or Alcohol Use	– 1-2 capsules per day
HIV Infection	– 3-4 capsules per day
Bronchitis (to break up mucus)	– 2 capsules per day
Diabetes (to improve glucose tolerance and antioxidant function)	– 2 capsules per day
Amyotrophic Lateral Sclerosis (ALS), Multiple Sclerosis, Parkinson's Disease	– 4 capsules per day
To Help Reverse Build Up Of Mercury, Cadmium, Arsenic and other heavy metals	– 1-4 capsules per day (based on severity)
Cataracts	– 2 capsules per day
Polycystic Ovarian Disease	– 2 capsules per day

Active Ingredients

N-acetyl cysteine	350 mg
Alpha - lipoic acid	75 mg
L- Glutamine	300 mg
Milk Thistle (standardized to 80% silymarin content)	100 mg

Amounts for 1 capsule, 60 per bottle

Contraindications & Considerations

Conditions:

Physician approval is mandatory when using this product for individuals with liver ailments, kidney disease, diabetes or HIV infection
