

Chronic Pain or Inflammation? PAIN keeping you awake at night?

AMAZING Natural Remedies to Manage Pain & Inflammation

Four powerful anti-inflammatory herbs have exhibited the ability to reduce inflammation in joints and soft tissue just as effectively as NSAIDs, but **without the side effects** commonly experienced with those drugs. Conditions such as **arthritis** (both osteo – and rheumatoid) and **soft-tissue injury** respond very well to these herbs. For **joint issues**, combining them with glucosamine sulfate, bromelain, MSM and quercetin is shown to **reduce pain and increase mobility**.

Is pain keeping you from getting a good night's sleep?

Whether your pain is from a recent injury or a chronic condition like arthritis, Adëeva **Nyquinadol** can help! A 6:1 extract of California Poppy, **Nyquinadol** is **proven** to reduce pain and encourage restful sleep without the potential side-effects of prescription pain-killers or sleep aids.

- **Works the first night**
- **Not addictive**
- **All-natural ingredients**
