

# Chronic Pain or Inflammation?

**Manage it  
NATURALLY  
- NO side effects!**

Four powerful anti-inflammatory herbs — curcumin, boswellia, white willow bark, and ginger — have exhibited the ability to reduce inflammation in joints and soft tissue just as effectively as NSAIDs, but **without the side effects** commonly experienced with those drugs. Conditions such as arthritis (both osteo– and rheumatoid) and soft-tissue injury respond very well to these herbs. For joint issues, combining them with glucosamine sulphate, bromelain, MSM and quercetin is shown to reduce pain and increase mobility.
